CHANGING THE GAME OF SHOWBIZ!
FOLLOW YOUR DREAMS! - TOUR 2016!

MISSION PURPOSE

The purpose of these live national and global productions is to promote a message of hope and encouragement to our world using mainly, but not necessarily exclusively Christian, Kingdom-based performances as outreach comes in many different areas and fields. These productions will revolve around non-religious and religious screenplays written in a way to include songwriting, singing, comedy, acting, and dance among other talents including some improv here and there. Each performance will have its own message to a specific targeted audience which include morals, real life events, and a great message of hope, love and encouragement.

Each performance will showcase each performer and their individual talent in addition to showcasing the collective talents of all including the directors, producers and all involved behind the scenes. Many talented individuals find themselves at differing levels in the pursuit of their dreams. This production company's purpose is designed to help these individuals increase their talent level and experience along the way to either remain in this realm and/or to go on to other things the Lord has planned for them. The bottom line is that we are here in this generation at this time to help others find their way to what the Lord has for them. In this endeavor, all will be able to come together at His leading to do all He has for us in our generation, so that He can look back at our generation and tell us, "Well done, my good and faithful servants!"

Most general performances will consists of four things:

1. Professional performances by talented and dedicated actors, dancers, comedians and singers etc., performing in high quality sets, sound and wardrobe.

2. A secondary meeting following the performance, where applicable, for any who would like to gather to spend some time together in worship to the Lord, to connect to one another and/or other areas of networking. When His people come together, there must also be time for other things that might need to happen and so we have accounted for this.
3. In some venues, such as schools and corporate events, a later performance and/or concert can be scheduled that portrays the Gospel of the Lord with a clearer understanding. We realize that not all venues will let us do this with a general audience, so we have made this option available. Having this two-set production and/or possible music concert available provides us with the added ability to perform in some venues that wouldn't otherwise be possible.
4. Availability provided for prayer and counseling for those in need during and after the performance, especially targeting depression and suicidal tendencies. Our goal is to work with various local church fellowships and non-profit organizations who provide a service in this area, with the possibility of adding fundraising to the venue to help these communities meet special financial needs.

[Special targeted groups may require targeted screenplays, productions, performances and special meeting requirements]

VENUES

1. Church buildings to be used for their own group and/or the public

2. Hotel ballrooms and meeting rooms depending on the needs of the client
3. Larger meeting areas including theaters [Studio Movie Grill] and outdoor stages with our own portable stage in a tractor/trailer rig.
4. Local performances for local performers to have an opportunity to act even if they are unable to travel with the traveling groups
5. Become an additional source of marketing for each individual's talent, books, videos, music, etc. Our goal is to help everyone fulfill their dreams.

PROFITABILITY

1. Some performances will be a free outreach to the communities, giving back into the community for its support of the performers. Most of these, including certain church setting performances will receive donations. There may or may not be enough to pay performers their going rate in any of these given productions so each performance would be on a volunteer or limited funds basis for these special outreaches. We believe that each worker is worthy of his wages and recognize there are occasions to volunteer as well.
2. Excellent performances, productions and shows designed for ticket sales to support the performers and help them in their God-given journeys.
3. This production company is designed to be a profitable Kingdom entity. It is designed to be a separate Christian Kingdom business either free standing in an event or in an association with other businesses, church fellowships, and agencies who come together in specific purposes to promote a better way to live and work together. Each individual entity and the whole should be a model of His love for His people and to those who don't know they are His yet. It is a model of Christian Kingdom business to illustrate how it works in the world we live. It will challenge the culture to the level that there is a better way and that it is attainable. It is a paradigm that creates a path of change to a better way of life in all and in everything it touches.

PLAN OF ACTION

We are searching for like-minded people in certain targeted cities, who care about their community, city, state, and country; investors who want to see change and are able to help financially; plus willing workers and professionals in the specified areas necessary to bring the production from start to finish and to take it from its modest beginnings into all the Lord has determined for it to become.

We will also purchase/rent buildings/warehouses/studios for offices, practice, photography, filming, etc. in various cities as we plan to have at least eight teams touring the world.

This is a very short and simple part of the whole vision. At this point, we shall see how the Lord directs and those who He connects in varying degrees. His Kingdom, His plans and purposes...

Habakkuk 2:2, "Write down the revelation and make it plain on tablets so that a herald may run with it."

Joseph's Paraphrase:

"Write out the vision so those to whom it applies, might be able to see it and understand it, then out of that, run with it to enable and create its fulfillment."
